Overview

With the theme ‘ITS in Daily Life’, Stockholm aimed to explore how ITS can improve our everyday mobility with a strong emphasis on co-modality and ITS solutions for all transport modes. The multi-modal theme was reflected in the Exhibition where various commercial exhibitors, public administrations and ITS related organisations showcased the technologies and services that are changing the face of transport. Stockholm marked a clear transition from an era of demonstrations, pilot trials and local deployments to a time of large-scale deployment coupled with enhanced integration of services. The London experiment with a Ministerial Plenary debate was repeated on an even larger scale.

The Congress featured 4 Plenary Sessions and Round Tables, 3 Host Sessions, 14 Executive Sessions, 72 Special Sessions, 111 Technical/Scientific Sessions and 36 Interactive Sessions, 4 Lunchtime Debates and 6 Ancillary Events.

Key topics (Plenary Sessions, Round Tables and Ministerial Session)

Ministerial Plenary & Round Table
Economic growth with a sustainable climate response

Industry Plenary & Round Table
Future transport – a multimodal challenge: ITS solutions ensuring environmentally friendly transport
